## MEMORANDUM

TO: Paul La Courreye, EPA

FROM: ~~Jane Hoppin, Ecology and Environment, Inc.~~

DATE: December 1, 1986

SUBJECT: North Center Street Landfill in Mesa, Arizona

cc: Patty Cook, Ecology and Environment, Inc.  
Jeff Rosenbloom, EPA

In the course of performing a site inspection of Tri-City Landfill on the Salt River Indian Reservation, two abandoned landfills in the immediate area were identified. One is the former location of Tri-City Landfill; the other is a landfill that was owned and operated by the City of Mesa. Due to their proximity to Tri-City Landfill, they may be partially responsible for the organic contamination of groundwater in the area. Therefore, FIT recommends, in order to address appropriately area groundwater contamination, that the North Center Street Landfill in Mesa, Arizona be referred for a CERCLA site inspection.
